Comment : Please help us here in ASheville NC. We have wonderful stations that we can not hear because a ☐non-local☐ station (WIMZ of Knoxville) is creating massive interference for our local WPVM-LP due to the unique contours of our mountainous terrain. LPFM stations, especially those in challenging mountainous terrain, should be permitted to own translators.I support the FCC position on getting rid of the obsolete regulation of ☐third adjacent channel☐ spacing and your efforts ☐to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating.☐
